

Helping build a better Guernsey

Building the future

At Norman Piette Ecohomes, our core focus is on helping clients attain their goal of environmentally responsible homes.

Timber is a sustainable alternative to other building materials such as steel and concrete, and offers enormous benefits to homeowners by providing excellent thermal insulation and thereby reducing household fuel bills.

Our timber frame construction uses precision engineering to ensure the highest level of accuracy and quality, and our total-care approach will offer peace of mind during its build.

For more information please contact a member of the Ecohomes team on 245801 or call in to our reception above the main showroom, Bulwer Avenue.

Norman Piette prides itself on supplying quality timber and panel products. With the island's only timber mill and manufacturing plant, we are able to offer anything from bespoke mouldings to roof trusses and timber frame buildings.

Carcassing

With up to 400m³ of Carcassing in stock, Norman Piette can offer the widest range of preservative treated and untreated structural timbers on the Island. Services offered include resawing and crosscutting to specification, plus regularising and planing.

Joinery

European Redwood (Pine) Grades 1 – 4 unsorted. We hold a wide range of prepared Joinery softwood off the shelf. Sizes can be machined to your specification from our timber mill or sold in its sawn state. Grade 1 is available in certain sizes.

Mouldings

A wide range of profiles are available from stock, with architrave and skirtings manufactured from unsorted grade Redwood. Also available are T&G floorboards, shiplaps, door linings, etc. A full detailed price list is available. A wide range of pre-primed MDF skirtings, architraves and window boards are also stocked.

Hardwoods

A range of sawn hardwoods are available from stock and can be machined to your specification by our timber milling operation. Ideal for flooring, skirtings and architraves, etc.

Our stock range includes American White Oak, American Ash, Canadian Maple, Iroko, Utile and many more.

Softwoods

We only stock top quality grades of Joinery timber and our range of softwoods include Cedar and the highly durable Siberian Larch.

Roof Trusses and Timber Frame

From your architect's plans we offer a full estimating, design, manufacturing and delivery service for timber frame, metal web joists and Gang-Nail roof trusses.

Special Milling Service

Our timber mill is equipped with machinery for creating bespoke mouldings in both softwood and hardwood.

We have hundreds of cutters available for mouldings, but if a particular design is required, a cutter can be created for an additional cost.

Species of wood available

Selected by experienced staff, all of our hardwood is straightened, cut and then planed to the required size. The softwood is sourced from top UK manufacturers and comes in set sizes. We keep only the best quality Grades 1 – 4 of Joinery timber. Norman Piette only supply timber sourced from sustainable and well managed forests and it's kept covered to ensure its quality.

Hardwoods in stock:

European Oak

A durable hardwood which is yellowish-brown in colour and well known for high strength qualities with a very good resistance to decay.

Uses: Cabinetry, furniture, interior trim, flooring, boat-building, decking, sleepers, heavy structural use etc.

Utile

A tropical hardwood suitable for interior/exterior use and a cheaper alternative to European Oak. It has a reddish colour and can be stained, varnished or painted.

Uses: Furniture, joinery, decorative veneers, flooring, boat construction etc.

Iroko

A very durable hardwood with a medium to coarse texture which finishes in a golden brown colour.

Uses: Cladding, flooring, furniture, boat building etc.

Beech

An important and widely-used hardwood in Europe due to its hardness, wear-resistance, strength and excellent bending capabilities.

Walnut

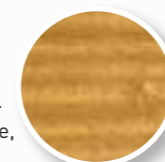

An excellent timber to work with due to its moderately coarse texture as well as a fine but open grain.

Ash

Has a medium to coarse texture similar to oak. The grain is almost always straight and regular, in a light to medium brown colour.

American Oak

Similar in colour and appearance to European Oak, it is used in a variety of applications due to its strength and resistance to decay.

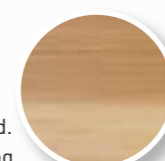

Softwood in stock:

Cedar

A reddish-brown, non-resinous, light-weight softwood. This sawn timber is used where light weight and durability are required.

Uses: Shingles, boarding, cladding, gates, fencing etc.

Siberian Larch

A highly durable softwood derived from the Larch trees of Russia.

Uses: Cladding, exterior joinery, flooring, decking etc.

Special order only:

Accoya

One of the latest high technology advances in timber having been thoroughly tested for dimensional stability, durability, paint retention and in-ground conditions to ensure optimal performance.

Also available

Claddings

Saw Sharpening

Planer Blade Sharpening

Firrings for Roofs
